### REMARKS

The Office Action dated February 25, 2000, has been received and carefully noted. The period for response having been extended from May 25, 2000, until July 25, 2000, by the attached Petition for Extension of Time, the above amendments and the following remarks are submitted as a full and complete response thereto.

The specification is objected to in the Office Action because the application does not contain an Abstract of the disclosure as required by 37 CFR 1.72(b). An Abstract on a separate sheet is respectfully submitted.

The arrangement of the specification is also objected to in the Office Action for failing to provide the proper section headings. Applicant has amended the specification to include the proper section headings as illustrated in the Office Action.

Claims 1-6 and 8-11 were rejected under 35 U.S.C. § 102(e) as being anticipated by Ohashi et al. (U.S. Patent No. 6,018,205). Ohashi was issued on January 25, 2000, and is based upon U.S. Patent Application Serial No. 09/209,445. This application was filed on December 11, 1998. The present invention, although not filed until April 7, 1999, has an effective PCT filing date of October 7, 1997, and claims priority from Finnish Application No. 09/60512, filed on October 8, 1996. Applicant respectfully directs the Examiner's attention to the international filing date. Under PCT rules, the effective U.S. filing date of the present application should be at least the international filing date of October 7, 1997, which predates the filing date of Ohashi. The application should also be entitled to the Finnish filing date of October 8, 1996, even though this date is not necessary to invalidate the reference. Under PCT Article 11 and 35 U.S.C. § 363, Ohashi therefore appears not to be a valid reference under 35 U.S.C. § 102. Accordingly, Applicant respectfully traverses the rejection and submits that Ohashi is an improper reference under 35 U.S.C. § 102(e).

Claims 7 and 12 were rejected under 35 U.S.C. § 103(a) as being unpatentable over Ohashi in view of Sheerin (U.S. Patent No. 5,844,333). Given that Ohashi is an improper reference, the rejection regarding Claims 7 and 12 should be moot.

As discussed above, Applicant respectfully submits that Claims 1-12 are in condition

for allowance and respectfully request that this application be issued.

If for any reason the Examiner determines that the application is not in condition for allowance, it is respectfully requested that the Examiner contact by phone the Applicant's undersigned attorney at the indicated telephone number to arrange for an interview to expedite the disposition of this application.

In the event that this paper is not being timely filed, the Applicant respectfully petitions for an appropriate extension of time. Any fees for such an extension together with any additional fees may be charged to counsel's Deposit Account No. 01-2300.

Respectfully submitted,
